

Yaounde, 10 August 2019

Press Release

Following the serious incident at the BRGM substation in Yaounde on August 7th, emergency works are in progress to re-energize all customers

Eneo Cameroon S.A. informs the public that following the incident at the BRGM station in Yaounde, efforts made to minimize the inconveniences have allowed to re-energize, up to now, only 70% of the customers impacted.

Several works are ongoing to construct, extend and reconfigure the network, and will allow to re-energize the remaining 30% as soon as possible.

Temporarily, and considering power grid constraints, a supply rotation plan is running, and will extend, while gradually decreasing, until the end of the current month.

The actual reconstruction of the totally damaged substation will last between three to six months.

Eneo renews its full solidarity to all those affected.

For more information, customers are advised to regularly visit the official Facebook page www.facebook.com/Eneo, the Twitter account @EneoCameroon14 and the Eneo website www.eneocameroon.cm, or call the Eneo Call Centre at 8010.
